

GENERAL FAQ

Hundreds of decisions go into a Phoenix home remodel. At Homework Remodels, a trusted Phoenix home renovation contractor, we strive to make the pre-construction phase seamless. To help you navigate the discovery phase of your remodel planning, we have compiled a list of frequently asked questions about Phoenix home remodels that reflect the desert climate, energy-efficient renovations, and outdoor living spaces.

What is your experience with remodeling homes in the greater Phoenix area?

Founded in 2005 by Steve Shinn, Homework Remodels is a premier Phoenix home remodeling company specializing in the greater Phoenix area. With a deep understanding of the local climate, materials, and building codes, we have a proven record of transforming client visions into stunning reality. We are a licensed Arizona contractor with a reputation for exceptional design and quality craftsmanship in Mid to High-End Home Remodels and Custom Home Renovations.

What are your areas of expertise?

- Concept Completion Renovation Experts for kitchens, bathrooms, whole-home remodels, room additions, guest houses (casitas & ADUs), and commercial renovations.
 - Desert Climate Expertise: Optimize your home for the Phoenix climate with energy-efficient remodels and drought-tolerant landscaping.
 - Outdoor Living Space Design: Create your dream outdoor living space perfect for year-round Phoenix living.
-

Can I meet with a consultant for a free estimate and discuss my remodeling project?

Yes! We offer a free consultation and would be happy to meet with you! Our goal is to collaborate with you in the design of your home remodel so that it matches your vision and lifestyle. Knowing what goes into the remodel process can give you a solid foundation of what to expect for the remodel you are planning.

How do you begin planning the Home Remodel?

We always start with our pre-construction phase to ensure that we create the best overall plan with a budget that works for you.

GENERAL FAQ

Are there costs associated with the pre-construction phase?

We offer free consultations and budget evaluations. Fees start at \$1,500.

DESIGN/BUILD CONCEPT

We use the Design/Build approach to remodeling that merges design and construction functions. Unlike some General Contractors, we plan all aspects of your remodel. This allows us to streamline your remodel project on paper from inception to completion before we begin.

Key Benefits to the Design/Build Process:

- **Cost Transparency:** We provide accurate proposals based on on-site visits with trade partners.
- **Fixed Budget:** All aspects are finalized before signing, ensuring a fixed budget.
- **Quality Assurance:** Professional designers, skilled craftsmen, and project managers.
- **3D Renderings:** Visualize your design before construction begins.
- **Enhanced Communication:** A dedicated project manager keeps you informed.
- We are leaders, both locally and nationally, in the National Association of the Remodeling Industry (NARI). We participate in their training and certification programs to promote higher levels of professionalism. We are NARI certified as Master Certified Remodeler, Master Certified Kitchen Bathroom Remodeler, Universal Design Professional, and Green Certified Professional.

With dedicated project management, Homework Remodels manages the details while you enjoy the journey.

DESIGN SERVICES

Do you offer design services in addition to construction?

We offer comprehensive design services as concept-to-completion renovation experts for Phoenix homes, casitas, and commercial renovations. We also offer Home Design Consulting. As part of our Design/Build process, we work hand-in-hand to collaborate with you on all details of the design to include:

- Floor plan options

GENERAL FAQ

- Appliance Selection
 - Cabinet styles and color choices
 - Countertop material and slab selection
 - Tile selections include decorative accents for backsplashes, floors, or showers.
 - Plumbing features include styles, finishes, and locations.
 - Electrical features, lighting fixtures, and their placement
 - Coordinate color choices for all features and walls.
-

COST AND BUDGET

Can you provide a detailed estimate of my project?

Yes. At Homework Remodels, a leading Phoenix home remodeling contractor, we provide detailed estimates for your project. When you transform your home with us, you will find high-end design, build, and remodeling that perfectly reflects your unique style. Our proven process includes an initial consultation, design phase, and construction. We explore your space, define the scope of work, and discuss comparable budget ranges.

What factors can influence the final cost of the project?

Changes are common in home remodels. Design changes, material changes, and changes to the scope of work can impact on the final cost. Set aside an additional 10% or more to cover potential changes. All changes are documented.

Will Homework Remodels Provide a Written Lien Waiver?

We collaborate with subcontractors and ensure they are paid for their services and materials. We provide a written lien waiver upon project completion upon request, ensuring you have paid in full and protecting your property from liens.

PERMITS AND REGULATIONS

Are you familiar with Phoenix building codes and permitting processes?

Yes, we stay up to date with all the building codes and permitting processes in Phoenix. As Renovation Experts, we know all the permits and inspections needed and will file for them promptly to coincide with your remodel.

Will you oversee the permitting process?

GENERAL FAQ

We take care of every aspect of interacting with the city to approve our construction plans and obtain necessary permits. We produce all necessary drawings and paperwork for the city permit application. As Historic Phoenix Home Renovation Experts, we understand the zoning variances and historic approval process and can take care of special hearings and approvals when necessary.

Do you have insurance to cover any potential damage during the project?

Our company and all of our Trade Partners are fully insured, with both liability and Workers Comp Insurance, to financially protect you as the homeowner.

Do you work on all ages of homes?

Yes, Homework Remodels is experienced in remodeling homes of all ages and types in the Greater Phoenix area. We specialize in everything from historic restorations to the Valley's newest homes.

CLIMATE-RELATED QUESTIONS

How do you manage extreme heat and dust control/air quality during the remodeling process?

Arizona's intense heat, monsoons, and dusty conditions can pose significant challenges during remodeling projects. We care about our workers and when the heat is extreme, we schedule the most labor-intensive tasks for cooler hours, set up shade structures, and provide adequate cooling equipment while remodeling your home.

In Arizona, before demolition or excavation, we will thoroughly wet down the area to minimize dust generation. When necessary, we use Negative Pressure Enclosures, and HEPA Filters (ventilation) and we will frequently clean work areas and equipment to remove accumulated dust.

Can you design outdoor living spaces that are suitable for Arizona's Climate?

We design outdoor living spaces tailored to Arizona's climate, focusing on:

- Prioritizing ample shade to protect from the intense sun, especially during peak hours. Consider pergolas, umbrellas, or awnings.
- Proper ventilation is important to mitigate heat and humidity. Choosing materials that allow for airflow, like slatted wood or metal screens makes all the difference.
- In Arizona, incorporating water features like fountains or pools creates a cooling effect and enhances the ambiance.

GENERAL FAQ

- You will want to opt for low-maintenance landscaping that includes drought-tolerant plants and landscaping that require minimal watering.

What steps do you take to ensure energy efficiency in Arizona's desert environment?

We optimize energy efficiency in desert home remodels by focusing on:

- Insulation: Prioritize proper insulation in walls, ceilings, and attics to prevent heat transfer. Spray Foam insulation adds cooling benefits.
- We pay attention to Installing high-efficiency HVAC systems with proper ductwork.
- Choose energy-efficient windows with low-E coatings to reflect heat. Consider window treatments like blinds or shades to control sunlight.
- Choose energy-efficient models with Energy Star ratings and consider appliances with specific desert climate features, such as drought-resistant dishwashers.
- Install a tankless water heater to reduce energy consumption.
- Explore solar panel installation to generate clean energy and offset electricity costs.
- LED Lighting

By incorporating these strategies, we significantly reduce energy consumption and create a comfortable, sustainable living space in the desert.

POOL AND OUTDOOR LIVING

What are your recommendations for outdoor kitchens and entertainment areas?

With year-round outdoor weather in Phoenix, we design a lot of outdoor kitchens along with expanding entertainment areas and are happy to share some of our recommendations!

- When planning your outdoor kitchen, Homework Remodels will help you choose heat-resistant materials such as natural stone, stainless steel, or ceramic for countertops and appliances.
- Consider a built-in grill or outdoor fireplace for year-round cooking.
- Shade Structures
- We think the details are just as important outside as they are inside. Your outdoor kitchen needs ample storage for cooking utensils, dishes, and outdoor appliances.
- You will want to ensure sufficient countertop space for food preparation and serving.
- Get inspired by Phoenix's landscape and embrace the desert aesthetic with cacti, succulents, and native plants for your outdoor living space.

GENERAL FAQ

- Use cool-colored materials like white or light gray for surfaces to reflect light.
- Consider installing a misting system to provide a refreshing cooling effect. We can also install outdoor ceiling fans to help circulate air and create a breeze!
- Install adequate lighting to create a welcoming atmosphere in the evenings. Consider string lights, lanterns, or solar-powered fixtures.
- A fire pit or fireplace can provide warmth and create a cozy ambiance during cooler months.
- We can help you create a low-maintenance outdoor living space.

What is your experience with outdoor living spaces and pool renovations? We have years of experience with creating outdoor living spaces, patios, decks, and renovating pool areas. We work with trusted trade partners for services outside our licensed scope. A good example of a total renovation can be found [here](#).

WATER CONSERVATION AND SUSTAINABILITY

Do you offer water-saving options for plumbing and landscaping?

Yes, we can provide information on water-saving options for plumbing and landscaping.

- Plumbing: Low-flow fixtures, leak detection, Energy Star appliances.
- Landscaping: Smart irrigation systems, mulch, native plants, efficient watering practices.

Are you familiar with local water restrictions and regulations?

Homework Remodels stays informed about local water restrictions and regulations to ensure your remodel complies with all applicable laws.

Can you incorporate sustainable materials into the remodel?

Yes! Homework Remodels has NARI Certified Green Professionals. We can incorporate sustainable materials into home remodels by using recycled or reclaimed materials (salvaged wood, salvaged bricks, and recycled building materials. We can also choose energy-efficient materials in insulation, windows, and low-VOC paints and finishes. Using materials like porcelain and natural stone can be used for flooring, countertops, and other elements. While discussing the materials you want for your remodel, consider using locally sourced materials that can reduce transportation emissions and support local economies. Think about implementing water-saving features such as low-flow fixtures, rainwater harvesting systems, and drought-tolerant landscaping.

GENERAL FAQ

MATERIALS AND DESIGN

What materials do you recommend for a kitchen, bathroom, or home remodel in Phoenix?

Phoenix's unique climate demands specific considerations for material selection.

Kitchen Materials:

- Countertops: Quartz or granite for durability and heat resistance.
- Cabinets: Wood with a moisture-resistant finish for minimal maintenance.
- Flooring: Porcelain tile or engineered hardwood with waterproof underlayment.

Bathroom Materials:

- Countertops: Granite, quartz, or solid surface for durability and easy cleaning.
- Flooring: Porcelain tile or natural stone with non-slip finishes.
- Shower walls: Ceramic, stone, or porcelain tile for moisture resistance and durability.

General Home Materials:

- Exterior: Low-E windows, stucco or stone cladding for exterior walls, and a foam roof or low-sloped roofs to reflect heat.
- Interior: Energy-efficient foam, cellulose, and fiberglass insulation, low-VOC paints, and durable flooring like tiles or hardwood.

Can you provide examples of your previous work?

We are an award-winning home remodeler in the greater Phoenix area with 5-star reviews from our clients. We are happy to share with you (approved) contact information. You can see our award-winning remodels on our website's portfolio found [here](#).

Do you offer energy-efficient options?

Yes! We are a National Association of the Remodeling Industry (NARI) Green Certified Professional committed to education to bring the most eco-friendly yet practical products and remodeling techniques to each project.

There are hundreds of choices involved in every kitchen, bathroom, or home remodeling project. Each of these choices will affect how well your home works as a sustainable system.

GENERAL FAQ

As a Design/Build Green Certified Remodeler in Phoenix, we start each project with a pre-construction phase. During this time, we will do a detailed feasibility study of your kitchen, bathroom, or home remodel in order to make the appropriate choices for both sustainability and your budget.

PROJECT MANAGEMENT

How do you communicate with clients throughout the project?

Collaboration, transparency, and accountability are key to what we do at Homework Remodels. It is important to us that you have a positive experience during the remodeling journey. This means working together to identify your needs and your style in order to create the space for who you are and that fits your lifestyle. As such, you will get peace of mind from our team of expert designers, and dedicated master craftsmen who are here to guide you every step of the way to love your home again.

We have developed a proven process we go through with all our clients that spans from the initial consultation, through construction and on to the finishing process. Our principal objective is to guide you through every aspect of the remodel: from room layout/space to the most important detail of your new kitchen, bathroom, or home addition.

Do you provide regular project updates?

Our dedicated project manager serves as your point of contact and provides regular project updates throughout the construction phase.

How do you manage unexpected issues like finding mold or structural problems?

Discovering unexpected issues like mold or structural problems during a remodel can be disruptive and costly. At Homework Remodels, we approach these challenges proactively:

- **Thorough Initial Assessment:** Our team conducts a comprehensive evaluation before starting any project to identify potential issues upfront.
- **Open Communication:** We maintain open communication with clients throughout the process, promptly addressing any unexpected findings.
- **Expert Solutions:** We partner with qualified professionals to manage mold remediation, structural engineers, or other specialists as needed.
- **Client Focus:** We prioritize minimizing disruption to the client's lifestyle during the resolution process.

GENERAL FAQ

By anticipating potential challenges and having a plan in place, we can effectively address unexpected issues and keep your project on track.

How do you manage changes in the project scope?

Our project manager will notify you of any changes and discuss solutions that meet your vision. We will not make any adjustments without your approval, and all changes will be documented in a change order.

Warranty and Guarantees

We will warrant our work. Contact us for details on our policy for addressing post-project issues.

Can you provide references from previous clients in the Phoenix Area?

As a premier award-winning Phoenix home remodeler and renovation expert, we can provide clients we have worked with who have had similar projects completed. Check out our testimonies [here](#).
